

INTEGRITY • EXCELLENCE • INNOVATION

AAE Products are Proudly made in America

Arizona Archery Enterprises

AAE's Management Team

Thank you for your interest in AAE. This is an exciting time to be involved in archery. The growth has been extraordinary, including the youth market which has grown substantially. Archery is a great sport for the younger generation.

I am very proud of AAE and our dedicated team. Great people are the driving force in any progressive company, and I think of us as a family. AAE's team is passionate about archery and what we do—from engineering to production to customer service—we strive to be the best. We take our leadership seriously in this dynamic and changing industry.

Our partners, both manufacturers and shooters, are some of the finest in the industry.

Every year I think archery equipment has evolved to its maximum potential. Every year I am proven wrong. That, combined with the continuous increase in precision of today's archers, produces amazing results. This has put more pressure on manufacturers to produce equipment that exceeds the archers' expectations. AAE strives to do just that. New, innovative products are continually being developed. Every year we make small changes to our existing products where we see an improvement is possible. It may only be adding an engraving mark on one of our rests or slightly changing material in one of our vane lines to improve the toughness, but we never stand still.

Good luck and good shooting!

Max Stealth • Max Hunter • Pro Max • Plastifletch Max

MAX STEALTH

AAE's MAX Stealth vane offers the whisper quiet shape of our 2.6" Elite Plastifletch vane with the durability and flexibility of our proprietary MAX material. The MAX Stealth also features the ultra stable, air channeling "ribbed" design the MAX line is famous for. This combination results in an extremely quiet and accurate vane that every archer and crossbow hunter will appreciate.

One size: 2.7", .50" high. Available in nine colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Red, Sunset Gold, White, and Yellow. Packaged in display packs of 40, 100, or boxes of 500 bulk.

All Max Vanes require MAXweld Primer Pen and Max Bond glue for proper adhesion.

Tiffany Lakosky

CRUSH
WITH LEE & TIFFANY

Lee Lakosky

MAX HUNTER

AAE's Superior High Profile Vane

Max Hunter is unlike any other high-profile, 2-inch vane on the market. It is made of an unique proprietary material that is not only extremely durable, but soft and flexible, allowing a high degree of helical, or fletching wrap, around the smallest-diameter shafts. The vane also offers exceptional bonding capability (when used with our MAXweld Primer Pen and Max Bond glue) and a unique rib design that channels air for increased flight stability and accuracy. It is the ultimate broadhead vane for serious performance and ease of use. One size: 2.10" long x .580" high. Available in nine colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Red, Sunset Gold, White, and Yellow. Packaged in display packs of 40, 100, or boxes of 500 bulk.

Gregg Ritz

HUNT
MASTERS

AAE PRO MAX

AAE's Pro Max vane is a 1.7" long x .460" high profile vane designed to be the perfect size for 3D and mechanical broadheads. We used the superior design of our Max Hunter vane, scaled down for improved bow clearance. Made from our super tough Max material for durability.

Available in nine colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Red, Sunset Gold, White, and Yellow. Packaged in display packs of 40, 100, or boxes of 500 bulk.

Plastifletch Max

Plastifletch Max has a perfect width base for great adhesion and proper shaft fit. It's designed with a thinner (.018") section to keep it light and flexible. The first vertical section of the vane is thicker for added vane stiffness and durability. Ribs channel the air vortex, making the vane control the arrow more efficiently. "Elastimax" material surpasses all other vanes with its toughness, durability, and adhesion. The Plastifletch Max 2.0 shield-shaped vane adds another size for archers who want a 2-inch low profile vane.

Available in two sizes: PM-16, PM-2.0 Shield. Nine colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Red, Sunset Gold, White, and Yellow. Packaged in display packs of 40, 100, or boxes of 500 bulk.

WAV • Elite Plastifletch • Quickfletch

AAE WAV

AAE's WAV vane is the toughest and most accurate vane for the world class recurve archer. It is designed to be used with any fletching jig, and will stay on your arrow shaft shot after shot. Low profile for riser clearance, ultra thin (.010/.3mm) and very durable. The WAV vane is winning tournaments and world championships.

Available in nine colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Red, Sunset Gold, White, and Yellow. Packaged in display packs of 50 and boxes of 500 bulk.

Elite Plastifletch

Elite Plastifletch is made from a special proprietary blend of materials that gives it great memory, durability, and instant adhesion. The concave base has an applied activator to improve adhesion and speed arrow assembly. Tough material, vane to vane consistency, and bright colors has made Elite Plastifletch the

most widely used vane in the world. Available in five sizes: EP-16, EP-23, EP-26, EP-40, and EP-50. Ten colors: Black, Blue, Bright Green, Fire Orange, Hot Pink, Purple, Red, Sunset Gold, White, and Yellow. Packaged in boxes of 500 bulk, bags of 100. Also packaged in bags of 50 with a 3-gram tube of Fastset Gel.

Pro Drop and DOA Compound Rests

PRO DROP

Limb or Cable Activated Fall-Away Rest

The most accurate and stable limb-driven fall-away rest on the market is now the most versatile as well. The new and improved Pro Drop can quickly and easily be converted from a limb-activated to a cable-activated fall-away in a matter of minutes. The Pro Drop's stainless steel axle rotates on twin stainless steel sealed ball bearings for ultimate accuracy, dependability, and longevity. The Launcher Arm stays up longer, increasing the time the arrow

is on the rest which leads to more accuracy. The Pro Drop also features a shortened "Drop time" allowing for maximum clearance. The Whale Tail Launcher utilizes a proprietary urethane to over-mold on the ultra-forgiving spring steel launcher. The activation cord is coated stainless steel to minimize stretching. AAE's Limb Sandwich allows for upper or lower limb mounting. The Pro Drop is micro-adjustable both horizontally and vertically, making it easy to set-up and tune. Included is our Launch Pad to deaden any arrow or rest noise. Available in Standard, Hoyt Tec, Extended, or Carbon Mounts. RH/LH.

DOA

Full-Capture Drop-Away Rest

The DOA features a full-capture cage to prevent the arrow from falling off the launcher on a stalk or in a stand/blind. The DOA has twin stainless steel sealed ball bearings to support the stainless steel axle for accuracy and longevity. Our proprietary trigger mechanism includes a nano-second delay, allowing the rest to stay up longer resulting in added accuracy and forgiveness. The DOA does not cycle when the archer lets down to prevent unwanted noise, the arrow falling off the rest, or the need to re-cock the rest in the heat of the moment. The launcher arm is flexible for added forgiveness and minimal arrow noise.

Installation is quick and easy using the EZ-Clamp, making attachment to the downward traveling cable extremely adjustable. AAE's Launch Pad and custom-cut clear launcher tape are also included. Available in RH/LH.

Standard Mount: Black, Pink, Red

Hoyt Tec Mount: Black

Short Brace Mount (for short brace height bows): Black

RIVAL  WILD

Compound Target Rests

Jesse Broadwater's

freakshow

The Ultimate in Precision Arrow Rests

Featuring Jesse Broadwater's Mount Design

The *freakshow* is the toughest, most accurate micro-adjustable target rest on the market today. It utilizes Jesse "The Freak Show" Broadwater's unique torque tuning methodology, and it comes in either an extended or standard mount. AAE's proprietary hex alignment launcher blade system is also featured allowing the archer to change out the blade without having to re-adjust their tune. The launcher arm rotates for the exact blade angle preferred. Laser-etched adjustment lines and oversized lock-down machine screws ensure adjustments are visible and rest is secure. The *freakshow* comes with two different original length launcher blades to help the elite target archer adjust for the perfect tune: standard width in .010" thickness installed and wide width in .012" thickness. *Freakshow* components are Stainless Steel.

Standard or Extended Mount

This rest is available in two models: the Standard Mount, or the Extended Mount, which allows the rest to be set in the optimum position for torque tuning.

Launcher Styles

There are several launcher styles to help the elite target archer adjust for the perfect tune. All launcher blades are available separately.

- Freak Blade (FITA arrow) width in .008", .010", or .012" thicknesses
- Standard width in .008", .010", or .012" thicknesses
- Wide width in .008", .010", or .012" thicknesses

Slot length: 1.645"

Extended Mount.
Slot length: 2.693"

Jesse Broadwater

Compound Target Rests

Pro Blade Compound Target Rest

The Pro Blade target arrow rest has been designed with the help of some of the top tournament compound shooters in the world. This rest has been built to meet their exacting standards for accuracy, durability, and ease of adjustment. Each Pro Blade has been CNC machined to very high tolerances. We believe our Pro Series frame is the finest platform for a target rest ever produced. Launcher blades included with the Pro Blade are the most common sizes and thicknesses used; original length Standard width in .010" thickness installed and wide width in .012" thickness. Pro Blade components are Stainless Steel.

Available in RH/LH.

Standard: Black, Blue, Green, Pink, Red, Silver

Hoyt Tec: Black only

Red

Hex Launcher Blade Alignment System

AAE's proprietary hex alignment launcher blade system is also featured allowing the archer to change out the blade without having to re-adjust their tune.

Launcher Blades

All blades are available in three thicknesses: .008", .010", and .012", and two lengths: Original length: 1.85", and short length: 1.625".

The **Freak Blade** was specifically designed through a collaboration of AAE's engineering team and Jesse "The Freakshow" Broadwater.

The **Freak Blade** utilizes AAE's proprietary hex cut out for precise launcher blade replacement. This blade is specifically designed for the skinniest of FITA arrows used for outdoor shooting. The arm length, width and depth of the fork cut were tested and evaluated by Jesse and our team resulting in the most accurate launcher blade in the industry.

The **Standard Blade** is the most versatile of all the launcher blades. The width allows for a wide range of arrow sizes while maintaining the fork length and depth of cut this blade has become famous for. This blade also utilizes AAE's proprietary hex cut out for precise launcher blade replacement.

The **Wide Blade** was specifically created for use with large diameter indoor and 3D arrows. The wide blade maintains the proportional fork and depth of cut length while scaling up to support the largest of arrows. This blade also utilizes AAE's proprietary hex cut out for launcher blade replacement.

Emily McCarthy

Compound Rests

Jesse Broadwater, 1995, age 11, after a perfect 560 Hunter round.

lil' freakshow

Full-Capture Rest

The *lil' freakshow* was created to offer the advantages of a full-capture rest with the accuracy of a launcher blade target rest at a price point every parent could afford. The crew at AAE knew that Jesse Broadwater would settle for nothing less than what he knew would help every young aspiring archer achieve their goals. Jesse has been setting the standard by which all other archers are measured, beginning when he shot a perfect 560 Hunter round at the Outdoor Nationals as a youth.

The *lil' freakshow* is the perfect target rest to get your child headed in the right direction. It also features a dual bushing system with a precision ground axle and adjustable launcher for both accuracy and ease of adjustment. The adjustable cage provides full arrow containment for safety. Available in Black or Pink. RH/LH.

Stinger Release Rest

The Stinger arrow rest is designed to be an economical, precision arrow rest. It features a dual bushing system with precision ground axles and sliding prong system for both accuracy and ease of adjustment. This simple, sturdy rest can also be fitted with optional launchers. RH/LH.

Hawk Eye

Full-Capture Limb-Driven Fall-Away Rest

The HawkEye is a full-capture, limb-driven, fall-away rest. It features our flexible DOA launcher arm for increased accuracy. It has a dual bushing system with a precision ground axle and sliding launcher system for simple tuning. Included is AAE's limb sandwich and Launch Pad for easy set-up and quiet shooting. The adjustable cage provides full arrow containment. A great rest at a great price. Available in Black or Pink. RH/LH.

Fall-Away Rest Accessories

NEW!

Pro Series Blade Holder—This all-new Pro Series Blade Holder allows the archer to use any of AAE's Pro Series launcher blades that have the alignment hex. It fits on any rest with a 3/16-inch shaft. Blade not included.

Launch Pad—deadens the launch impact of all fall-away rests, provides security, and helps locate your arrow before the draw.

eZ Clamp—installs quickly and securely to your up or down cable with two Plastite® screws to ensure a firm and safe grip on the cord. Unique set screw provides easy timing adjustment.

Universal Limb Sandwich—is easy to install. The unique set screw design allows for easy timing adjustment of all limb driven rests. Fits all bows.

Round Limb Sandwich—is easy to install. It has a unique set screw design allowing for easy timing adjustment of all limb driven rests.

Hoyt Split Limb Sandwich—is for the Pro Drop or other AAE limb-activated fall away rest. It provides maximum clearance between the modern larger diameter cams and factory installed limb dampeners.

Emma Wilsey

Gripper by AAE

Gripper Single Mount

The newly designed **Gripper by AAE** adds to the already proven design of the original gripper. Gripper's proprietary tapered engagement offers maximum surface area contact for the ultimate in security while using 7075 aluminum to provide the most rigid connection to the bow possible. AAE's new proprietary BLS (Bolt Lock System) automatically micro-drives the Gripper apart when the user loosens the bolt. The BLS prevents the unwanted seizing or binding common with anodization, allowing the user to quickly and easily make minor adjustments. Laser etched reference marks have been added to both axis to monitor the finest of movements. Available in: Single Mount; Single Mount with Quick Disconnect. #Getagrip

Single Mount

Single Mount with Quick Disconnect

Gripper Double V-Bar Mount

The **Gripper V-Bar Mount by AAE** offers unmatched adjustment and stability for archers shooting a V-Bar. Featuring 7075 aluminum, the wider body portion offers additional clearance while the tapered engagement provides maximum surface area contact for the ultimate in rigidity. Available in: Double V-Bar; Double V-Bar with Quick Disconnect. #Getagrip

Double V-Bar

Double V-Bar with Quick Disconnect

Gripper Quiver Mount

The **Gripper Quiver Mount by AAE** offers unmatched adjustment and stability for archers wanting to mount a back bar off the side of their bow using an accessory or quiver mount hole. Featuring 7075 aluminum, the Quiver Mount includes a bolt and washers to aid in mounting. Available in: Quiver Mount; Quiver Mount with Quick Disconnect. #Getagrip

Quiver Mount

Quiver Mount with Quick Disconnect

Quick 10

The **Gripper by AAE Quick 10** is a 10-degree, Quick Disconnect that is the most stable QD on the market today. Made from 7075 aluminum for the ultimate in rigidity, the Gripper Quick 10 was also designed for a perfect on center alignment of any stabilizer on the market. #Getagrip

Quick 10 Disconnect

Hot Rodz Target Stabilizers

NITROUS

The **Nitrous** is for the archer that wants the ultimate tournament bar. It is constructed from a proprietary blend of ultra stiff high modulus carbon, making it the stiffest and most forgiving of any bar available.

AAE's Nitrous stabilizers offer benefits and features unlike any other stabilizer on the market. The bars have a small .700" O.D. that is as stiff as the top tournament bars available, and have internal dampening for a smooth shot.

The Nitrous features AAE's Hidden Weight System (HWS). Each Front Bar comes with a 1-ounce cap and a 2-ounce internal insert.

The standard 1-ounce black cap can hold two additional hidden brass weights, for a total of 5-ounces. The optional 4-ounce stainless steel cap increases the front weight capacity to 9 ounces without changing the O.D. of the bar. This greatly reduces the wind profile of the stabilizer.

Back Bars/Side Bars feature a larger diameter weight system incorporating a 6-ounce tapered weight that increases the leverage factor of the weights and maintains a smooth wind profile. Weights are sold separately.

Nitrous Specifications

Front bar lengths: 33", 30", 27", and a 18" Wind Bar
When properly balanced, the Wind Bar will not affect the arrows impact point as a result of the stabilization change from the archer's standard front bar to the Wind Bar.

- Front bars come with one 2-oz. insert weight and a 1-oz. outer Black Cap that will hold up to two additional hidden weights.
- Other HWS components sold separately.

Back Bar/Side Bar lengths: 15", 12", and 10"

- Back Bars/Side Bars come with one vibration ball.
- 1-oz., 3-oz., and 6-oz. tapered weights sold separately in Stainless Steel or Black.

Hidden Weight System (HWS)

AAE's proprietary HWS allows the archer to maintain the desired amount of forward weight while maintaining the bar's overall wind profile.

The **New Heavy Hauler** is the largest weighted End Cap available for the Nitrous HWS. The Heavy Hauler weighs in at a stout 15-ounces and can hold up to five ounces internally.

The new 1/2-ounce wight insert allows for micro-tuning of the HWS. HWS weights are available in: 1/2-ounce and 1-ounce Brass Weights (2-pack).

HWS End Caps:

- 1-ounce Black End Cap holds up to two ounces for a total of five ounces.
- 4-ounce Stainless Steel End Cap holds up to three additional internal ounces for 6–9 ounces of total weight.
- The Big Rig 8-ounce Stainless Steel End Cap holds up to four additional internal ounces for 10–14 ounces of total weight.
- The Heavy Hauler 15-ounce Stainless Steel End Cap holds up to five additional internal ounces for 17–22 ounces of total weight.

Hidden Weight System (HWS)

1/2-oz. and 1-oz. weights

15-oz. Heavy Hauler

8-oz. Big Rig

4-oz. Stainless Steel

1-oz. Black

All HWS weights sold separately.

STREET ROD

Jesse Broadwater

Jake Kaminski

Photos: Ben Van der Velde

MADE IN U.S.A.

NEW!

We are proud to introduce the **NEW Hot Rodz Street Rod** stabilizer. The Street Rod was specifically designed to allow archers to maximize their stabilization potential while remaining on a budget. The Street Rod features hi-modulus carbon with the fit and finish AAE

customers have come to expect. With a MAP price of \$139.99, the Street Rod is the perfect stabilizer for youth and beginning archers. Available in: Front bar: 24", 27", 30"; Back bar: 10" and 12".

Pro Stock and Hunting Stabilizers

Target Stabilizer Weights

As the archery industry continues to advance, Archer's ability and demand for tune-ability grows with it. When 1-oz. seems to be just too much, the new 1/3 oz. weights allow the archer to make the smallest of adjustments. Available in: 1/3 oz. aluminum or aluminum anodized black (3 pack).

Back and Side Bar Weights

PRO STOCK

The **NEW Hot Rodz Pro Stock Hunting Stabilizer** is the most tunable bow hunter freestyle type stabilizer on the market that does not change the overall length of the bar (that may result in violations of the 12" max rule during competition). The Pro Stock's proprietary end cap allows the weights to be screwed on the outside of the end cap rather than to the end. The Pro Stock will accept up to 16-ounces

on the end and comes equipped with two 2-oz. disk weights with 4-oz. weights being sold separately. The end cap weighs 3-oz. and comes with three spacers to ensure no matter how many disc weights the archer uses, the weights are always centralized at the end of the bar for maximum effectiveness.

Available separately: Pro Stock weight: 2-oz. or 4-oz.

Hot Rodz—HR Sling

The HR Sling is super durable and very easy to adjust. Available in seven colors; Brown Camo, Orange, Black, Green, Blue, Pink, and Red.

Western Hunter Stabilizer

Whether out West chasing high country mulies, or in a stand shooting across a corn field at that white tail of a lifetime, you need a bow that is balanced. Most hunting stabilizers provide an adequate amount of front weight but do nothing to counter balance quiver and sight weight. AAE developed the Western Hunter to allow the hunter to balance the bow just like a tournament bow. A balanced bow reduces torque and makes for a more accurate shot. It comes with two carbon rods, 8" and 10", 5 oz. of adjustable weights, one bracket, and two vibration-dampening balls. Available in Black, RH/LH. Additional weights sold separately: 1-oz. (2 pk.), 3-oz., and 4-oz. tapered weight.

Adhesives

Max Bond

Max Bond is specifically formulated for our Plastifletch Max and Max Hunter vanes. This glue also works well with Elite Plastifletch and most other plastic vanes. Max Bond is a high-viscosity liquid that is easy to work with and penetrates well when using our tough Elastimax material. Whether you are fletching carbon or aluminum, this is the toughest glue available. Packaged in a .7-oz. (20-gram) or 2.0-oz. (59-gram) bottle.

Max Impact

Max Impact is AAE's superior insert adhesive designed for high impact applications. Max Impact is blended with rubber to increase its ability to withstand and absorb sudden high loads. Works great on inserts. Packaged in a .7-oz. (20-gram) or 2.0-oz. (59-gram) bottle.

Bailey Peterson

MADE IN U.S.A.

MAXweld Primer Pen

AAE requires using the MAXweld Primer Pen applicator for maximum adhesion on all MAX vanes.

Max Clean Arrow Wipes

AAE's Max Clean Arrow Wipes are a quick and easy method of cleaning arrow shafts for proper fletching adhesion. No more spilling liquids or smelly chemicals in your house or shop when prepping arrow for new shaft or re-fletching projects! Max Clean Arrow Wipes can be used on all forms of carbon, aluminum, and crested arrows.

Max Clean Arrow Cleaner

Max Clean is a concentrated, eco-friendly powder that dissolves in water, removes oils, and changes the pH of the surface of the shaft. Each capful will clean about 200 arrows. Works on all types of arrow shafts. Included is enough powder to clean 500 shafts. Available in standard 3-oz. size or 8-oz. bulk that mixes in a large container.

Jason Peterson's

Into the Wild

Fastset Gel

Fastset Gel is a cyanoacrylate adhesive specially formulated for gluing AAE nocks and Elite Plastifletch to both aluminum and carbon shafts.

Its higher viscosity makes application easier and bonds Plastifletch to the shaft instantly, creating a strong, permanent bond that must be cut to be removed. Available packaged in a 3-gram tube, a 9-gram tube, or a bulk box of 25.

AAE Epoxy

AAE Epoxy is a two-part epoxy for gluing nock and point inserts and all aluminum inserts into aluminum and carbon shafts. It is also an excellent all-purpose epoxy that retains a very flexible bond. The syringe is designed to dispense equal amounts of resin and hardener to maximize strength. Packaged in a 1.7-oz. syringe.

Jason Peterson

Nocks and Arrow Components

Plastinock

AAE's Plastinocks have a double snap design that gives a positive string fit but allows the arrow to leave the bowstring smoothly. Longer ears and an angled throat design keep the nock on the bowstring at any string angle. Its thin base gives the nock a perfect blend to the arrow shaft. Available in:

- Four sizes: 1/4", 9/32", 5/16", and 11/32"
- Seven colors: White, Black, Red, Blue, Flu. Orange, Flu. Ruby, and Flu. Green
- Packaged in bags of 100 or bulk bags of 1,000

Arizona Z-Nock

The Arizona Z-Nock uses a snap-on design for a positive string fit resulting in a smooth release from the bowstring. The main difference between the Z-Nock and the Plastinock is the Z-Nock's larger finger pinch area, allowing you to nock your arrows quickly and easily. The angled throat design keeps the nock on the bowstring at any string angle, and the thin base blends perfectly to the arrow shaft. Available in:

- Four sizes: 1/4", 9/32", 5/16", and 11/32"
- Seven colors: Flu. Green, Flu. Ruby, Flu. Orange, Blue, Red, Black, and White
- Packaged in bags of 100 or bulk bags of 1,000

Fiberglass Nocks

The Fiberglass Nock is designed for entry level fiberglass arrows. Available in:

- One size to fit 17/64" shaft diameter
- Colors: Green or Orange
- Packaged in bags of 100 or bulk bags of 1,000

Moon Drivers

Moon Driver plugs are for crossbow bolts. Moon drivers have a half-moon shape for string engagement, and are made by high-tolerance injection molding. Available in:

- Moon Driver sizes: 2117, 2216, and 2219
- Color: Green
- Packaged in bags of 100 or bulk bags of 1,000

AAE GOLD Target Archery Products

About AAE Gold

AAE teamed up with several of the world's best recurve archers to design a line of products that would meet the needs of the internationally competitive archer. AAE's Gold products are the result of that effort.

Jake Kaminski

KSL GOLD Finger Tab

Designed by Coach Kisik Lee with an adjustable, ergonomically designed palm plate.

AAE's cutting-edge design of the KSL Gold Tab represents a breakthrough in ergonomics, comfort, and feedback. Every curve, part, and edge has been ergonomically designed to conform to the contours of the shooting hand while prompting correct technique and providing a secure fit. The KSL Gold Tab fits like a glove every time. The Cordovan face is oriented on the grain of the leather, and face and backing on the KSL tabs are replaceable. It features our custom made elastic finger strap for more comfort. The KSL tab plate comes in either brass or anodized aluminum. The brass will give the archer the added weight in the release hand for extra stability. The Palm Plate is made from a hard composite material allowing for increased adjustability to find

Rear view of KSL GOLD Finger Tab in brass.

KSL GOLD Finger Tab in brass.

the precise feel every archer is looking for. The KSL Gold Tab comes with an adjustable finger spacer. Brass tabs come with brass finger spacers; anodized aluminum tabs come with anodized aluminum finger spacers. Both come

with an adjustable anodized aluminum ledge. Available in small, medium, or large. RH/LH. Brass or anodized aluminum, Cordovan or Super Leather

KSL Finger Spacer Kit

KSL Brass Palm Plate

KSL GOLD Finger Tab in black anodized aluminum

AAE's KSL Gold Tab Finger Spacer Kit adds a soft rubber cushion with an adjustable thickness from .400" to .600" to the KSL Gold Tab Finger Spacer.

- Available separately
- Fits KSL brass and aluminum tabs

Look for AAE GOLD in the Winners' Circle

GOLD Aiming Aperture

The Gold Aiming Aperture has a .019"/.5mm super bright fiber optic aiming dot. The small aperture results in a more precise aiming window down range. The thread attachment is an 8-32 thread. Orange, Blue and Green fibers are included.

GOLD Micro Plunger

Available in red, silver, blue, and black.

GOLD Micro-Clicker

AAE's Gold Micro-Clicker is the only micro-adjustable clicker made. The Micro-Clicker is designed to give all recurve archers a precision draw length adjustment. The Gold Micro-Clicker allows you to make precise adjustments while shooting and is fully adjustable to fit different bow and arrow lengths. Each click is .005" per click. It mounts under the sight and is slotted for easy adjustment. The Gold Micro-Clicker blades are made of nickel plated spring steel. Available in RH/LH.

The Gold Micro Plunger has been designed for the most discriminating archers. Incorporated in the design are several features and improvements that will help you adjust your plunger to achieve the arrow flight and accuracy you need for world class performance. With the help of Olympic Silver Medalist Jake Kaminski, AAE has created a new ultra light weight carbon stem that reacts faster than any plunger ever made. Combined with our Signature Teflon® sleeved stainless steel barrel, accuracy gains are unparalleled. AAE and Jake have also developed a new stem tip using aerospace materials that lasts incredibly long while not damaging carbon or aluminum arrows. Available in Black, Red, Silver, or Blue.

MADE IN U.S.A. 

Recurve Rests

Free Flyte™ Elite

The Free Flyte™ Elite is a CNC machined version of our popular Free Flyte™ arrow rest. This rest can be mounted with the conventional side plate or the riser can be drilled and tapped for ultimate stability. The dual magnet system allows for both inward and outward movement of the arrow support arm. There are two positive locking vertical and horizontal adjustments that allow each archer to set up this rest to fit any bow and make quick, positive changes for each set-up and arrow diameter. This is the ultimate finger style rest for the serious target archer or hunter. The Free Flyte™ Elite rest must be used with a plunger. We recommend using either the Master Plunger or our Gold Plunger for an unbeatable combination. Patent No. 5,503,136. Available in Black. RH/LH.

Free Flyte™

The Free Flyte™ is two rests in one! Position the magnet one way and the arrow support arm becomes a flipper style rest. Reverse the magnet and the support arm folds away upon release for perfect clearance. Ideal for hunting, target, and 3-D shooting, the Free Flyte™ can be used for either release or finger shooters. Patent No. 5,503,136. RH/LH.

Free Flyte™ Micro

The Free Flyte™ Micro is an upgrade of our popular Free Flyte™ rest. We have added a very simple horizontal micro-adjustment and positive lock. This handy adjustment is especially helpful to the target shooters trying to super tune their equipment, or the bowhunter looking for perfect broadhead flight. Patent No. 5,503,136.

Champion II

The Champion II rest is designed for elite finger shooters. This rest fits on the inside of the sight window, eliminating the need for screws or bolts. The opposing magnets give a very light tension on the arrow support arm similar to our Free Flyte™ and Free Flyte™ Elite rests. This simple and totally adjustable rest is easy to set up and tune, yet provides the same time-tested accuracy as our other finger shooter rests. RH/LH.

Super Flyte™

This unique rest has a versatile mounting bracket for easy installation, an adjustable hex rod for deep center cut bows, and a removable spine point for use without a plunger. The arrow cage has been added as a safety feature for the beginning or young finger shooters, allowing the arrow to stay contained if it happens to fall off the support arm during the draw or shot. This is the perfect rest to put on your training bows in church camps and youth clubs. In addition, this reliable rest has a replaceable support arm for quick changes in the field. RH/LH.

Super T-300™ Hunter

Black Lexan® backed with self adhesive foam tape. Stainless steel spine point, plus Teflon®-coated replaceable support arm.

Super T-300™ Target

White Lexan® backed with self adhesive foam tape. Stainless steel cover plate, plus replaceable support arm.

T-300™ Hunter

Silver metal backed with self adhesive foam tape. Teflon®-coated replaceable support arm.

T-300™ Target

Silver metal backed with self adhesive foam tape with a replaceable support arm.

Tabs and Accessories

NEW!

SMALL MEDIUM
THREE FINGER UNDER

SMALL MEDIUM
TWO FINGER UNDER

Student Tab

AAE's two and three finger under tab was designed especially for students who want to take their archery shooting seriously. The plate is made from a lightweight material and uses our Super Leather face. This affordable tab is made for shooting light poundage bows and is made for either the right or left handed shooter. Both Two and Three Finger Under tabs are available in Small and Medium sizes. Blue, Green, and Pink come in small, and Orange and Yellow in medium.

Elite Full Face Tab

For archers that shoot traditional three finger under, the Elite Full Face Tab provides the same precision alignment as our Elite Tab. The Super Leather face and backing are replaceable and come with the Elite Tab Ledge. Available in: Small, Medium, Large, and X-Large. RH/LH.

Elite Finger Tab

The Elite Tab is used by most top competitors due to its versatile arrangement. Its anodized aluminum plate and completely adjustable ledge are enhanced by the unique features of replaceable faces and backing. The Elite Tab comes with the original Elite Tab Ledge and Elite Tab Finger Spacer. Available in Cordovan, Super Leather, or Hair. Sizes: Small, medium, large, or extra-large. RH/LH.

Elite Adjustable Finger Spacer Kit

AAE's Adjustable Finger Spacer will adjust in thickness from .400" to .600" with a soft cushion rubber external surface that allows you to shoot comfortably all day long. The Adjustable Finger Spacer fits AAE's Elite Tab.

Super Sling

This durable finger sling is made with soft nylon and flexible vinyl components for an accurate fit. One size fits all. Available in Black, Blue, Red, White, Yellow, 5" Short, and 6" Long.

Re-Designed!

Stable Lock/Quick Detach

The Stable Lock is a quick detach system for your stabilizer. It's very easy to use. Just one quick twist and it's off. Made of anodized 7075 aluminum.

Arm Guard

The AAE Arm Guard is designed for the elite target shooter. It is a very thin, very tough arm guard that is contoured to fit snug and secure. This guard gives maximum protection and maximum string clearance and is vented for hot days on the shooting line. Available in Black, Blue, Hot Pink, Orange, Red, White, and Yellow to coordinate with your equipment or clothing.

Plungers and Clickers

Master Plunger

A stainless steel barrel with smooth action Teflon® sleeve enhances this superb plunger. A replaceable tip and two sizes of tapered springs contribute to the finest micro-tune possible. Available in Black, Blue, Pink, Red, and Silver.

Long Master Plunger

This long variation stainless steel barrel with smooth action Teflon® sleeve is specifically designed for deep center shot bows. A replaceable tip and two sizes of tapered springs contribute to the finest of micro-tunes. Available in Black, Blue, Pink, Red, and Silver.

Master Lok Plunger

Specifically designed for wrap-around rests, the extra long and heavy stainless steel barrel with smooth action Teflon® sleeve makes this our most versatile plunger. Two sizes of tapered springs are included for accurate tuning. Available in Black only.

Master Plunger Colors

Available in Black, Blue, Pink, Red, and Silver. *Master Plungers are not designed for wrap around rests.*

Magnetic Clicker

The Magnetic Clicker incorporates our dual magnet system into a clicker designed for the target or IBO shooter using light weight carbon or aluminum arrows. Very light side pressure against the arrow, plus a positive sound and feel, make this clicker unique. The clicker mounting plate fits under the sight block. The clicker wire can be bent and adjusted to fit all bows. The clicker can also be reversed for compound shooters using a long overdraw.

Extended Clicker

The non-slip Extended Clicker design features a solid, one-piece mounting bracket noted for its ease of adjustment. It also incorporates three magnets; one in the rod holder, one in the channel, and the third at the bottom of the striker rod. Working together they help eliminate bounce-back and vibration after the shot. Available in Black or Pink.

Adjustable Magnetic Clicker

The Adjustable Magnetic Clicker fits under the sight mounting block and is easily adjustable for arrow length or clicker positioning. The dual magnet system provides a positive sound and feel unlike any other clicker. The lower positioning of the clicker rod reduces visual interference with the sight at longer distances.

Lube Tube

AAE's Lube Tube makes pulling arrows out of any target easier than ever.

Just push the arrow point through the cap to lube. The no-odor lube will not affect arrow flight. The container is reusable with refill lube available separately.

NEW!

Lube Tube Hole-In-One

The Hole-In-One is an adjustable mount that allows the archer to have their AAE Lube Tube attached to the bow. This unique design places the Lube Tube in the most convenient place for quick access. Now you can lube your arrow with minimal effort every time. The Hole-In-One comes with a 5/16-24 Low SHCS and a 1/4-20 BHCS to allow for multiple mounting options.

Fletch III

Fletch III makes fletching simple. Designed for archers and bowhunters, it is easy-to-use, accurate, portable, and affordable. Build identical arrows every time!

Fletch III features a fixed 1-degree offset and fits arrows .240" to .370" in diameter (ACC diameter to 25 aluminum diameter).

Each component is specifically designed from materials that enhance that component's function. For example, glue won't stick to the clamp because it is made of a highly rigid material containing Teflon® and silicone.

The X-Stand/Arrow Holder is designed for different sizes of arrow shafts. It is labeled "L" (large diameter) and "S" (small diameter) indicating which side of the stand to use.

Mag-Clip

The Mag-Clip is a handy, two section key chain system with strong magnetic fasteners. This accessory is useful for keeping archery accessories attached to you or your side quiver. Works great with arrow grippers, as a key chain, or for many hunting accessories. Packaged individually in seven colors: Red, Black, Blue, Bright Green, Orange, Pink, and Yellow. Or by the bucket—25 Mag-Clips per bucket in assorted colors. Mag-Clips can be custom printed with your company's logo. Contact AAE for more information.

Pro String Server

The Pro String Server features a heavy-duty anodized aluminum body and a unique double-bar tension system. The self-centering washers contribute to even tension when serving.

The replaceable, no-fray thread guide not only simplifies the threading process, but increases the smoothness of the serving process. This tool will produce the finest serving you have ever had.

Target Accessories

Standard with spring clip

Elite with Mag-Clip

The Original

Gorilla Grip Arrow Puller

The Gorilla Grip is a must have for any 3D shooter. The Gorilla Grip is made of solid natural rubber for superior grip on all types of arrows and it's the easiest and most comfortable puller on the market. Its large diameter has been designed for maximum grip strength. Available standard with a spring clip or Elite with our Mag-Clip.

Slippery Slide Guide

The Slippery Slide Cable Guide incorporates a tough Teflon®-filled material that reduces drag and increases accuracy. Available in eight colors: Black, Grey, Green, Pink, Red, Orange, Blue, and White.

Arrow Straightner, Caps, and Shirts

Arrow Straightener

AAE's Arrow Straightener is an extremely strong and rugged precision instrument made from hard anodized aluminum. The .0005" indicator allows a person to straighten an arrow to the tightest of factory standards.

Completely adjustable precision bearings enable the very tips of the shaft to be straightened. The Delrin® straightening pad will

not mark or dent the arrow. This tool will pay for itself after straightening a few dozen arrows.

Technical Bowhunting

Technical Bowhunting was written to change the way you think about shooting a bow, choosing equipment, setting up gear, making

tough shots in the field, and dealing with buck fever and target panic by delivering powerful advice and anecdotes. The book includes tips to help unlock your skill and potential as an effective archer and bowhunter.

Written by expert bowhunter Joe Bell, technical archery writer and longtime editor of *Bow & Arrow Hunting Magazine*, includes interviews and tips from some of the sport's greatest pros, including Chuck Adams and Randy Ulmer.

AAE's Mission Statement: We value people, operate with integrity, and strive to exceed our customers' expectations. This is achieved with excellence and innovation in all that we do.
